Lower School Summer Reading & Math Assignments

Summer Reading

We are excited about our summer reading program for rising kindergarten through fourth grade students! All returning families were given a color-coded Reading Tracker for this assignment at our lower school conference at the beginning of May. New families should have received their reading trackers in the mail from Ms. Tomblinson. **Students will track their reading throughout the summer and return the colored Reading Tracker on the first day of school in August.** All grade levels have at least one assigned book to read. In addition, **third and fourth graders** have an **assignment packet** to complete that supports their required reading. The required reading for each grade level will be the first text for the initial assignments during the first week of school. Copies of the Reading Trackers for each grade (Rising K-4) are available below.

- **Rising Kindergarten and Nature Kindergarten Reading Tracker**
- **Rising First Grade Reading Tracker**
- **Rising Second Grade Reading Tracker**
- **Rising Third Grade Reading Tracker**
- **Rising Fourth Grade Reading Tracker**

Summer Math

Your child's teacher **(Rising 2-4)** will provide review packets for students to complete over the summer as a review of the concepts they have covered during the year. Breaking this packet down to a page or two each day will be the best way for students to quickly review what they have learned and be fully prepared for next year. **These packets are also due on the first day of school**. In addition, **Rising First Grade students** can find a list of suggested games below. These games reinforce the math skills they mastered during the year in preparation for first grade.
